

1st newsletter Erasmus+ project „ICF-CY MedUse“

Dear Colleagues of early childhood intervention,

The EU-project, ICF-CY Med Use, will be taking place at MSH Medical School Hamburg (www.medicalschool-hamburg.de) and commence on October 1, 2015.

The ICF-CY Med Use is an advancement of its predecessor project www.icf-training.eu. It is about making ICF-CY more manageable for daily use in early childhood intervention, social paediatrics and integration day care. Moreover, we're aiming to make training in the field of ICF-CY more comparable.

The project will encompass the following framework:

- 1)'ICF-CY-Practice-Translator': Multilingual tools for electronic use of ICF-CY in daily practice are going to be developed (e.g. possibility to search for key words)
- 2) Curriculum for ICF-CY training
- 3) Multiplier events, in order to gain more publicity and increase the awareness for use of ICF-CY.

The project partners are from Germany (DGSPJ, VIFF, University of Heidelberg), Austria, Great Britain, Macedonia and Turkey.

If you are interested in participating in this project (e.g. in the framework of Multiplier events or in testing the products) please contact the Project Assistant, Ms. Janneke Brandt (msh-projectoffice@icf-training.eu) or visit our homepage www.icfcy-MedUse.eu from mid-October, 2015.

Please note, the third conference for handlers/operators (organized by the foundation Pfennigparade) will take place from November 20-22, 2015 in Munich. (Please register on www.rehakind.com).

Yours sincerely,

Prof. Dr. Manfred Pretis
